## DETAILED ACTION

### *Specification*

1. Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to **a single paragraph** on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

2. The abstract of the disclosure is objected to because it contains more than one paragraph. Correction is required. See MPEP § 608.01(b).

### *Allowable Subject Matter*

3. Claims 1-5 are allowed.
4. The following is a statement of reasons for the indication of allowable subject matter: The present application relates to the processing performed for recovered image during a digital image compression process, and in particular relates to a

deblocking filtering apparatus and method defined in MPEG-4 at the time of filing. The various related prior art of record fails to anticipate or render obviousness a deblocking filtering apparatus comprising a D mode and a T mode operation circuits and a selector for selecting between the two wherein, the D mode and the T mode operations comprise components 1 to 16 and 17 to 23 of figure 1, respectively and in combination with other limitations in the claims as specified in claims 1 and 4.
